

## BANCTEC SHOWCASES TRANSACTIONAL CONTENT MANAGEMENT AND DOCUMENT SCANNING CAPABILITIES AT AIIM INTERNATIONAL EXPOSITION AND CONFERENCE

**DALLAS – APRIL 15, 2010** – BancTec Inc., a global provider of advanced, high-volume, document and payment processing solutions and services, will feature its [CenterVision™](#) transactional content management platform and [IntelliScan®](#) family of high-speed, high-volume document processing solutions at the [2010 AIIM International Exposition and Conference](#), to be held April 20-22 in Philadelphia, at the Pennsylvania Convention Center. BancTec will be located in booth #1615 for AIIM, and in booth #324 for the co-located On Demand show, where it will highlight its [multi-vendor service solutions](#).

AIIM is the world's largest educational conference and exposition dedicated to content and information management products and solutions. Records Managers and IT buying teams attend each year to learn how to capture, store, manage, find, share, compile and analyze information.

At AIIM, BancTec will display the [IntelliScan® XDS](#)—the company's enterprise-class, multi-application, high-speed scanner. BancTec recently announced updates to its IntelliScan hardware and software solutions that focus on increased speed, user control and image quality. BancTec also lowered the price of its scanner for mid-volume and distributed environments, the [IntelliScan® SDS+](#).

[CenterVision®](#), BancTec's transactional content management platform that helps organizations manage multiple document processing operations and mailrooms across the global enterprise, will also be featured at AIIM. The solution helps improve business performance by monitoring user and operational productivity from receipt of the physical document, through the scanning and data capture process, to validation and completion of the transaction. CenterVision was also recently updated, with functionality that extends its processing capabilities to invoicing and accounts payable operations, speeds up content capture for new documents entering a business, and provides tighter control over the physical paper process prior to scanning.

Finally, BancTec's [BPO service offerings](#) will be highlighted at the show. BancTec was recently selected by BMO Capital Markets to provide retail remittance processing services (for tens of millions of payments each year) under a long-term BPO agreement.

"Our customers continue to communicate that one of their most important objectives in this challenging business environment is to reduce costs by gaining better control over their information and document/payment processing operations," said Chuck Corbin, BancTec vice president of worldwide marketing. "AIIM is an important show for us to communicate how BancTec hardware, software and services solutions form an integrated, robust platform to help them achieve these objectives."
